PROFESSIONAL SUMMARY

Aspiring Java Backend Developer. An individual who can write clean and optimize code. Like to solve Data Structure and Algorithms problems. I have made some solo and collaborative projects and continue to have some experience as well as acquiring more knowledge. Looking for enhancing my skills as a Backend Developer.

PROJECTS

CAB BOOKING APPLICATION

A REST API for an online Cab Booking Application where users can book cabs to travel from point-A to point-B. A collaborative project built by a team of 4 and executed in 4 days

Features

- Sign up, Log in, Log out modules, and authentication with session UUID. Customer module where customers can view and book types of cabs to travel from point-A to point B.
- Admin module where admin can add cabs, and drivers and assign to trip.
- Delete types of cabs, driver.

Tech-Stack

- Java | Spring Boot | Hibernate | MySQL

Area of Responsibility

- Created services layer and repository layer.
- Service layers like cab service, driver service, trip booking service, etc.
- A repository like a cab repository, driver repository, etc.

GREEKBUYING CLONE

Greekbuying is an Ecommerce website, in this project I worked with four other team members and completed project within 5 days.

Features

- End-to-End product purchasing flow from the website.
- All types of products available to purchase.

Tech-Stack

- HTML | CSS | JS

Area of Responsibility

- Team leader and lead the team in an effective manner.
- Work on navbar, footer, cart page and payment page.
