PROFESSIONAL SUMMARY

Aspiring Java Backend Developer. An individual who can write clean and optimize code. Like to solve Data Structure and Algorithms problems. I have made some solo and collaborative projects and continue to have some experience as well as acquiring more knowledge. Looking for enhancing my skills as a Backend Developer.

PROJECTS

APPOINTMENT BOOKING APPLICATION

A web application using Spring Boot that enables users to search and book appointments with doctors. The application also provides a calendar of available appointments, allowing users to select a time that works for them.

Features
- Sign up, Log in, Log out modules, and authentication with session UUID.
- No one can access any routes without permission.
- Multi-threaded application with email confirmation on registered mail id.
- Patients can book an appointment at a time that works for them.
- All input validation and password hashing before saving in the database.

Tech-Stack
- Java | Spring Boot | Hibernate | MySQL

Area of Responsibility
- Created controller, service, and repository layers.
- Service layers like book appointments, update appointment, get doctor's availability timing, review doctor, delete appointment etc.
- A repository like a doctor, patient, appointment, review repository.

GREEKBUYING CLONE

Greekbuying is an Ecommerce website, in this project I worked with four other team members and completed project within 5 days.

Features
- End-to-End product purchasing flow from the website.
- All types of products available to purchase.

Tech-Stack
- HTML | CSS | JS

Area of Responsibility
- Team leader and lead the team in an effective manner.
- Work on navbar, footer, cart page and payment page.
